at the most[, preferably 110 A at the most].

24. (Amended) Device according to [any of claims 17-23, characterised in] claim 17, wherein said means for the[, preferably automatic, registering/feeding in of general] registering and measuring data[, for each individual accumulator, which general data preferably] is chosen from the group consisting of name of the customer, date, accumulator manufacturer, type number for the accumulator, type values for the accumulator, year of manufacture, time of the first operational use of the accumulator, time between previously performed treatments, and type of device in which the accumulator is used.
25. (Amended) Device according to claim 24, [characterised in that] wherein said device comprises means for connecting it to a database[, preferably] via a network[,] for use of older general data and process data for previous treatment processes, for other accumulators and/or for previous treatments of the specific accumulator, in the controlling of the treatment process.
26. (Amended) Device according to claim 25, [characterised in that] wherein said network also is arranged to be used for the surveillance of the treatment process and/or for the upgrading of software for the treatment process.

REMARKS

Consideration and allowance of the subject application are respectfully requested.

Claims 1-42 are pending in the application.

Claims 1-26 have been amended merely to remove multiple dependencies and correct minor informalities. No claims have been amended to overcome prior art. No new matter has been added.

Basis for new claims 27-42 can be found in the present specification including as follows:

claim 27 at original claim 1;
claims 28-30 at original claim 4;
claims 31 and 32 at original claim 6;
claim 33 at original claim 7;
claims 34-37 at original claim 8;
claim 38 at original claim 10;
